

CROSSOVER

SERIE ARTESANÍA

The **admira CROSSOVER** classical guitar is the perfect hybrid solution by combining the character of a solid cedar topped classical guitar with the familiar feel of a non-classical acoustic neck profile. Halfway between a conventional six-string steel acoustic guitar and a traditional 48mm wide classical neck with a 20" radius fretboard. Suddenly the journey into the wonderful world of classical guitars becomes easy and fun with a guitar that is manageable, comfortable and cutting edge in its design.

The ARTESANÍA Series is made with the union between the body and the neck of the guitar through the Spanish heel. This construction is considered the most traditional in the production of Spanish classical guitars. It gives greater stability and sound projection to the guitars.

Our ARTESANÍA guitars are a fusion of selected top quality materials, designs and traditional manufacturing techniques crafted by our highly skilled and passionate luthiers. Our luthiers use traditional craft methods to produce guitars with exceptional tone, clarity and expression.

This is what makes the ARTESANÍA Series our crown jewel.
