

# INDIANA

## ACOUSTICS

Synonymous with comfort. That's how we'd describe our **admira ACOUSTICS INDIANA** mini jumbo electrified guitar. With spruce top for better resonance and available in seven colours and two finishes, gloss and satin.

With the ergonomics that we've given to the **INDIANA** acoustic guitar, it is remarkable how comfortable it is to play. Thanks to its mini jumbo format with cutaway, whose curves allow easier access to the farthest frets and also support a good string action. The original variety of colours of this **admira ACOUSTICS** line and the specially selected mother-of-pearl rosette combine to give it a sublime aesthetic that makes this range special.

Our **INDIANA** acoustic guitar comes electrified with a 3-band EQ, allowing you to connect it to your amplifier and mixing desk.

---

**top:** spruce
